Ellicott City, MD | 443-355-9706 | sanyagup@terpmail.umd.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio Website](#)

EDUCATION

University of Maryland

Bachelor of Science, Information Systems and Management

Achievements: SCRUM Certified, CompTIA Network+

College Park, MD

Estimated: June 2028

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML/CSS, React.js

Tools & Concepts: Git, Excel, Fusion 360, Windows/Linux OS, Data structures, Algorithms, Databases

PROFESSIONAL EXPERIENCE

inMorphis | *Software Engineer Intern*

May 2026 - Present

- Develop advanced GenAI technical skills by engineering 30+ complex prompt templates across 4 distinct LLMs
- Built an agentic RAG search system over PDF documents using agentic retrieval workflows, reducing manual information lookup time by 50%

Technica | *Inclusive Communities Organizer*

Mar 2026 - Present

- Organize a technology-focused summer program for 20+ incoming college students of underrepresented genders in STEM, delivering hands-on web development and backend training using Typescript, React, and Git, which equipped participants with practical professional skills
- Spearhead the project track of the summer program by creating 5+ full-stack projects using Typescript, React, and Git, enabling organizing teams to provide students with real-world development experience

MITRE | *Backend Enigneer*

Feb 2026 - May 2026

- Updated the search bar function to connect to all policies route and vectorize route to find similar policies as requested by the user, reducing the time to retrieve these policies by 50%
- Implemented a filter route for filtering over 50+ MITRE policies and added 5-6 categories and connected it to the frontend, allowing MITRE employees to find policies more efficiently
- Presented website to 10+ MITRE employees, securing critical user feedback to future improve policy retrieval

UMDollar - Robert H. Smith School of Business | *Software Engineer*

Sep 2025 - May 2026

- Collaborated Business Associate Dean Joseph Bailey, to define and prioritize feature requirements for UMDollar, increasing financial student engagement by 50% in the University of Maryland, College Park
- Advocated for platform expansion by presenting product demos and strategic roadmaps to 5+ executive stakeholders, including the UMD President, SECU sponsors, Deans of the Smith School and UMD Libraries, to align technical development with university-wide wellness goals
- Managed the complete product launch process for the Apple App Store by using TestFlight, ensuring the app met ASO standards and Apple's Human Interface Guidelines, resulting in a problem-free release
- Designed a route with dynamic course-matching logic through the UMD courses API, cutting the time to find relevant courses by 50%

PROJECTS

Mental Health Dashboard | <https://github.com/sanyagup/mental-health-dashboard-technica>

Jun 2025 - Aug 2025

Technica

- Developed a full-stack mental health dashboard using React, TypeScript, Vite, and Firebase that integrated data visualization components to track stress and productivity metrics for 100+ hackathon participants
- Engineered RESTful API endpoints to handle CRUD operations for journal entries and mood logs, reducing data retrieval and allowed for structured database
- Designed and built interactive charts using a data visualization library to display mood and productivity trends over time, improving user engagement with personalized insights

Personal Portfolio Website | <https://github.com/sanyagup/PersonalWebsite>

Jun 2025 - Jul 2025

- Built a responsive personal portfolio website using React.js, HTML, CSS, and JavaScript to showcase 5+ technical projects and professional experience
- Implemented a reusable, component-based architecture that reduced code redundancy by 60%, enhancing maintainability, scalability, and overall development efficiency
